Tendenci – The Open Source AMS
Features Sheet

Tendenci is open source Association Management Software built specifically for the complex, multi-threaded needs of organizations. All modules are included with every Tendenci launch.

Tendenci Software Modules/Features

1. **Multilingual –** Tendenci is in 70+ languages and is truly Open Source.

2. **Membership Management Software –** An all-in-one online website solution with multiple membership levels, custom applications, online join/renewal, recurring renewals, and automatic notices. MMS also includes the following:
   - A master calendar of events that allows for easy online event registration
   - Web content management on every page
   - A secure membership directory
   - A job board where prospective employers may post available positions and volunteer opportunities
   - Tools: video galleries, photo albums, social media
   - Press release and news article
   - Tendenci Reporting tools, which provide you with a day-by-day analysis of your web site

3. **Events —** Event Management Software helps you organize, promote, and register your events with ease! The events module includes:
   - Online registration and payment inside your website domain
   - 1-Click email to registered attendees with updates, post-event surveys and more
   - Add an unlimited number of speakers to an event for conferences and panels
   - Google Maps Integration so your registrants won't get lost

4. **Search Engine Optimization (SEO) —** Tendenci offers a full lineup of Search Engine Marketing (SEM) tools to help your site gain more traffic. Tendenci automatically:
   - Generates a Title Tag
   - Fills the Meta Description for your pages with a summary of the page content
   - Analyzes your content and generates top keyword phrases
   - Creates a search engine friendly URL based on your content Title
   - Automatic creation and updated XML Sitemap to list your content in search engine-friendly language
   - You can also integrate your web analytics for in-depth tracking so you can measure all the traffic to your site, including top pages, top referring sites, top keywords and top search engines.

5. **Career Management —** Job Board tools give you the ability to create your own online career center within your site. Site users and members can:
   - Search job listings
   - Print, save & share listings
   - Upload Resumes
   - Receive notifications
   - Allow human resources personnel 24/7 access to post and maintain open job listings for their company -- with one-click approval from you.

6. Content Management — Gives you the resources to manage and organize your website content without having to know HTML or other complicated programming tools.
- Full access to the HTML and Templates to easily change graphics or add new landing pages
- Feature Stories Module - keep your homepage fresh and relevant by quickly changing out the prominent images and links to highlight your news and events
- Tendenci Admin Bar - add or view content with a simple click
- Tiered Permissions - you can give your staff and volunteers as much or as little access as they need to manage the content on the site.

7. Reports — Tendenci Reports are built to provide insight about the users, content, and activities happening on your site. Below are a few examples:
- The Events Summary Report is capable of revealing information such as use of modules within the CMS, edits and additions made by users, and contacts submitted in the database
- View your Donations and identify your top Donors and most engaged Members
- Membership Reports include reports of activity by membership type over time. Reports are sortable and include a CSV export
- Custom reporting available through SQL Explorer - pull any data you want at any time

8. Donations & Fundraising — Tendenci simplifies the art of managing donations and fundraising for nonprofits and professional associations.
- Accept donations and sponsorship payments online
- Organize and track your donations and automatically generate invoices and reports

9. Forums — A great way for your membership to interact and support each other!
- Set permissions on your Forums to limit access to certain topics based on active membership
- Foster an online community for members to support each other
- Receive email notifications of activity for oversight

10. Payments — You can integrate an online payment gateway with all your Tendenci modules.
- Manage financial transactions in one place on your website
- Invoices & Reporting
- Add Merchant Account info in global settings (1 place) to implement in all modules
- Export to .csv
- Accept payments from Stripe, Authorize.net & more

11. More AMS Features /Modules Included — Your Tendenci launch comes with almost four dozen different modules that can be used to provide the best experience and member resource for your organization.
- Articles - what content marketing is all about
- Boxes - snippets of code to embed on any template you wish
- Case Studies/Projects - highlight what your associations outcomes are
- Categories - categories and subcategories apply to many modules
- Committees - organize content on committee pages automatically
- Contacts - track your engagement with contacts, subscribers and later members!
- Corporate Memberships / Organizational Memberships - groups that support you and buy group memberships
- Directories - a listing of affiliated businesses, associations, sponsors or a directory of members businesses
- Discounts Codes - apply AMS discount codes to events, memberships and many other modules

- Emails - email object that integrates with newsletters to send directly or through another provider
- Email Blocks (to prevent any email being set to that address ever)
- Entities - EAV structure to keep the revenue reporting straight
- Forms - Custom Forms Builder for all forms including event registration and membership applications
- Groups - organize your people and secure your association or company's content. Then track it
- Help Files - help files work for tendenci.com/help-files and they can be used for your group as well!
- Industries - Sort by Industry
- Locations - identify members by geographical location around the world
- Navigation - edit your web site's navigation on the fly immediately
- News and Press Releases - built in and optimized for SEO
- Newsletters - generate intelligent newsletters
- Rich Media – Create online videos and photo galleries, mass uploader, selective permissions, licensing
- Redirects - both 301 and 302 or can be done via htaccess
- Relief Assessments - emergency social services functionality for hurricanes, etc.
- Speakers Module - highlight the minds from your events
- Staff - list your staff or board of directors
- Stories - snippets that rotate through based on time
- Study Groups - groups and committees and technical interest groups
- Testimonials - accept credit when given!
- Users - (encompasses contacts, users, super-users, members - all are connected to a user account)
- Videos - link and intelligently embed videos
